Note:

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau.

All denominators use US Census data from 2003.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

2a Gender: None

Age: None

Race: New Federal Race/Hispanic Origin categories have not been implemented.

Overall: Tabled data is derived from the ME Medicaid Service encounter information and state hospital data. Non-Medicaid service utilization data is not included but is anticipated to be available by 2006. Data represents an unduplicated count of individuals served in the community and state psychiatric hospitals. Age, Gender and Ethnicity are obtained from the Medicaid Claims Data Systems. *The penetration rate reported for the ME site over estimates the true proportion of children with MH challenges who receive services in the state. This is the case because children's behavioral health services within the DHHS serves a broad range of children with MH, autism, MR and other developmental disabilities. The Dept. is currently working on a more effective methodology to separate out these service populations.

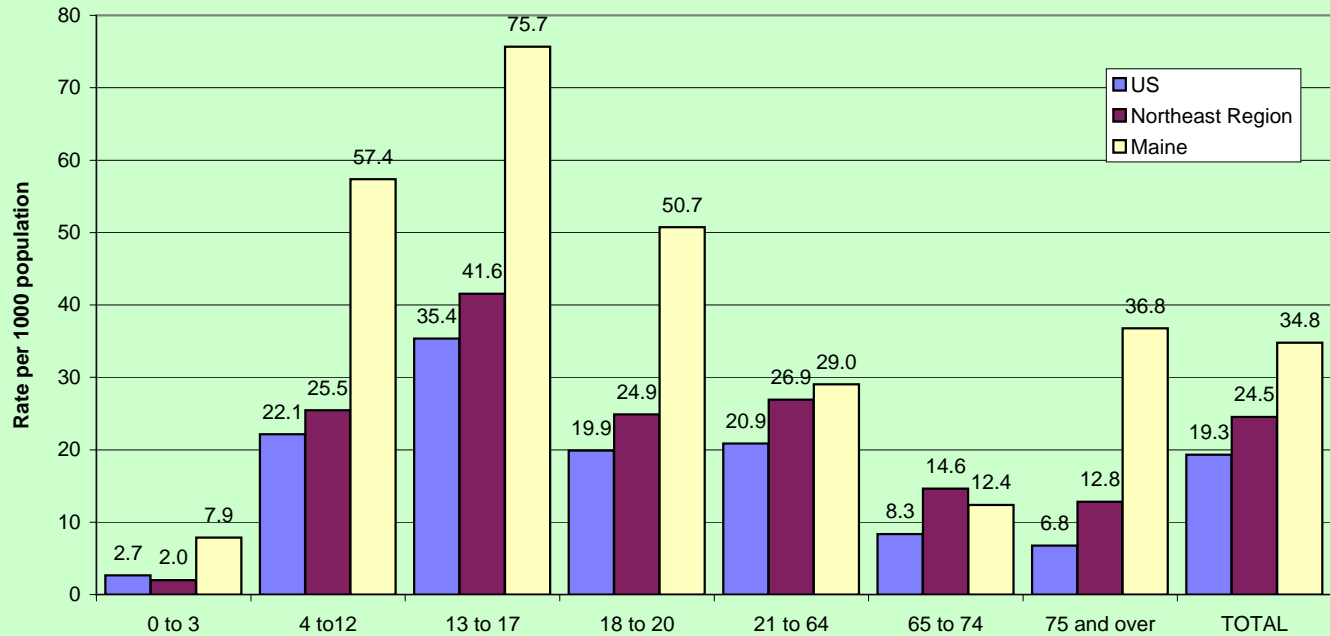

2b Gender: None

Age: None

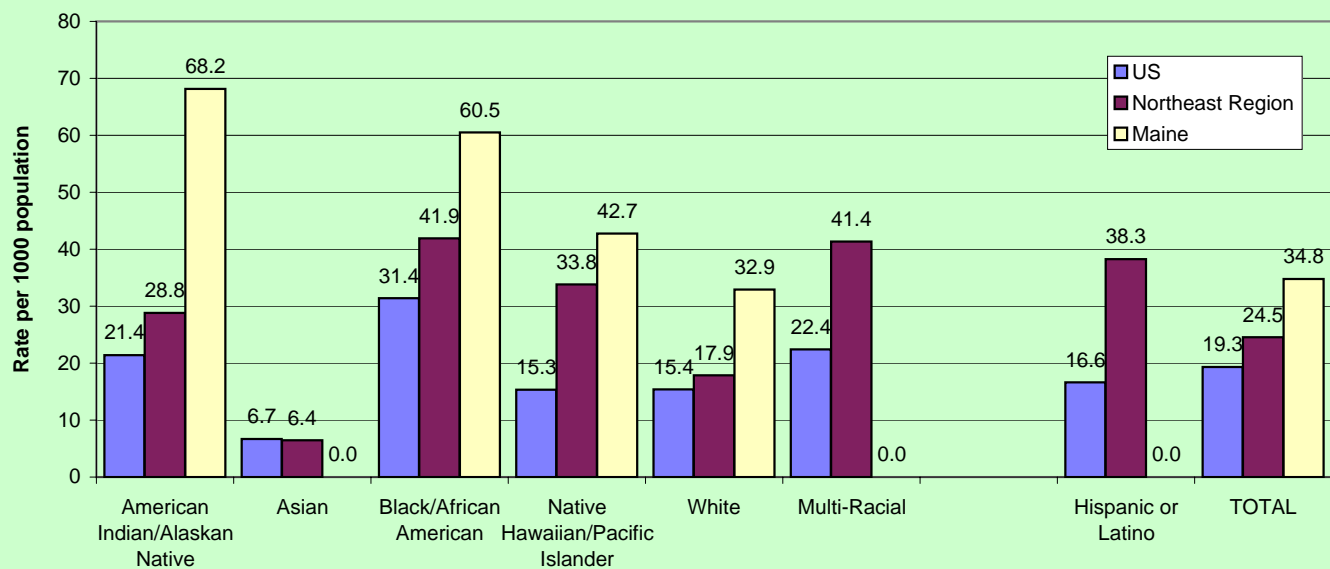

Race: None

Overall: Tabled data is based on Maine Medicaid Mental Health Service Encounter Data for FY2004 and state hospital information. Non-Medicaid service encounter information is not included and is anticipated to be available for the 2006 reporting period. New Federal Race/Hispanic Origin categories have not been implemented.
